Reasons for Allowance

Regarding claims 1-9, the art of record fails to teach or suggest an ostomy bag having a proximal end of a latent (interpreted herein as meaning hidden or not visible) tube attached to its upper end wall or seal, the tube having a length to an opposite distal end allowing gas to flow therethrough, the tube having two seals or walls, the tube's seals or walls are separated from the upper seal or wall of the ostomy bag except at the point of attachment at the proximal end of the tube, one of the tubes seals or walls being near the ostomy bag's upper seal or wall, the other of the tube's seal or wall being further away from the upper seal or wall of the ostomy bag than the first wall of the tube.

Regarding claims 10-14, most relevant art of record, Holtermann *et al.* (6,328,719 B1) fail to teach or fairly suggest an latent or hidden tube located externally relative the ostomy bag.

Regarding claim 15, the art of record fails to teach or suggest the closure means which includes a blank having a slit, the slit not being in communication with the bag's main chamber or the tube.

Regarding claims 17 and 18, the art of record fails to teach or fairly suggest an interval seal between spaced apertures combined with the structural limitations as discussed in detail in the Office action dated 06 February 2006.
